

Phase 10: Final Presentation & Demo

»» Pitch Presentation

- Crafted a 5-minute slide deck summarizing project goals, key features, and business impact.
- Highlighted Phase 1–9 milestones and major achievements.
- Included metrics (e.g., volunteer sign-ups, process automation count).

»» Demo Walkthrough

- Live demonstration of core flows: event creation, volunteer registration, approval process, and notifications.
- Showcased Lightning pages and LWC interactions (map, modal registration).
- Verified end-to-end functionality within the project.
- **Demo Video Link:** [Community Service Request and Volunteer Management Demo Video](#)

»» Client Q&A

- Allocated appropriate time on implementation, customization, and future enhancements.
- Prepared the project for security setup, integration points, and scalability.
- Documented possible requirements or concerns.

»» Feedback Collection

- Open to feedbacks and suggestions that could potentially improve the project.
- Ensured that the project is flexible in accommodating changes via continued feedback and suggestions.
- Prioritized action items for post-delivery support.

»» Handoff Documentation

- Shared final versions of: Phase 1–9 technical documents, data import templates, test classes, and org configuration notes on GitHub.
- Provided steps for ongoing maintenance (debug logs, user support, scheduled backups) along with future enhancements.
- Also provide step-by-step org configuration guides covering security, workflows, integrations, and automation.
- **GitHub Repository Link:** [GreenCity: Community Service Request & Volunteer Management](#)

»» Project Showcase

- Included link to demo video in the **Demo Walkthrough** section.
- Mentioned the GitHub repository of the project in the **Handoff Documentation** section.
